

Global balanced portfolio
December 2021

OBJECTIVE The primary objective is to provide above-average total returns (capital plus income) over a medium to long-term investment horizon, by investing in ordinary shares listed globally. The portfolio is designed to achieve a balance between income and capital growth. It will have between 40% and 75% in international equities and to manage overall risk, the portfolio will include exposure to fixed interest and cash. For diversification there may also be an allocation to alternatives and property funds. The underlying global fixed income exposure will predominately be focussed on investment grade government and corporate bonds, and will actively seek a total return for investors, through generating a reasonable income while attempting to preserve capital. Global fixed income exposure is provided through employing an active asset allocation approach to investing in fixed income assets across the investible global universe. This may include investing in direct bonds, and funds for diversification benefits, of global developed governments, global investment grade corporates, global emerging markets and global high yield.

WHY CHOOSE THIS PORTFOLIO This mandate is suitable for investors who are looking for a balance of risk and reward. They accept that seeking higher returns means there is an increased risk of capital loss compared with a more cautious strategy, but wish to balance this with a desire to avoid high levels of risk within their portfolio as a whole. Equity and property exposure will range between 40% – 75% and fixed income/alternatives/cash allocation will range between 25% – 60%. Investors in this portfolio could be exposed to potentially significant volatility due to a combination of underlying share price movements and foreign exchange impacts on portfolio returns.

GLOBAL EQUITY COMMENTARY

In December equity markets were largely positive across major geographies. The MSCI World ended the month up 4.3%. The MSCI North America was up 4% whilst the MSCI Europe excluding UK was up 6.4%. The MSCI UK All Cap was up 7.2%, the MSCI Japan was up 1.9% and the MSCI Asia excluding Japan increased by 3.3%. The MSCI Emerging Markets index was up 2.3%.

The Global Balanced portfolio outperformed the MSCI World Index by 0.89% during December. The overweight allocation to Healthcare and IT companies were the largest contributors this month, this was offset by an underweight allocation to Financials and Materials companies.

In terms of stock selection, AbbVie was the best performer in absolute terms rising by 17.5%. Other notable performers were Anthem (+14.4%) and Sabre (+14.1%). Alibaba (-6.9%) and NetEase (-5.5%) were the major detractors.

In the month we sold AbbVie and bought Yum China
